DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 14, 2006 has been entered.

Response to Amendment

2. Applicant's amendment submitted on July 14, 2006 has been received and carefully considered. Claims 1-14, 17 and 18 are cancelled. Claims 15, 16 and 19-27 are active.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1764

3. Claims 15, 16 and 19-27 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 2 of U.S. Patent No. 6,922,429.

Although the conflicting claims are not identical, they are not patentably distinct from each other because U.S. Patent No. 6,922,429 substantially claims the same reactor for removing alkali hydroxide and hydrogen peroxide contaminants in an aqueous alkali halide stream. The reactor of U.S. Patent No. 6,922,429 similarly comprises a plurality of inlets located in the upper region of the reactor for an alkali hydroxide stream (i.e., a first alkali hydroxide stream from the chloralkali cell), a contaminated alkali halide (i.e., the alkali chloride recycle stream from the separating apparatus), and a depleted alkali chloride solution (i.e., a depleted anolyte stream from the chloralkali cell); an inlet located at the lower region of the reactor for a chlorine gas (i.e., a first Cl_2 gas stream from the chloralkali cell); an outlet located at the lower region of the reactor for a treated alkali halide stream (i.e., a treated alkali chloride stream substantially free of alkali hydroxide and H_2O_2); and an outlet located at the upper region of the reactor for the escape of gaseous oxygen (i.e., an outlet for offgassing of oxygen).

It is noted that a restriction requirement was made between the method claims 1-14 and the apparatus claims 15-18 in the parent application of both the instant application and U.S. Patent No. 6,922,429 (see parent claims in US 2003/0215382 and US 6,763,051). However, a restriction requirement was never made between the "reactor" claims 15 and 16 (presented in the instant application) and the "system" claims 17 and 18 (presented in U.S. Patent No. 6,922,429). Therefore, the nonstatutory obviousness-type double patenting rejection still applies.

Response to Arguments

4. Applicant's arguments with respect to claims 15, 16 and 19-27 have been considered but are moot in view of the new ground(s) of rejection.
